Thanks.

The one quick question I have right now, based on comments yesterday from the representative from Clean Earth, is whether Clean Earth has the appropriate permits and capabilities to expand the current operations (Haz Waste Class B) into a facility that can handle dredge material for off-site transport.

Hello All.

I just wanted to remind you that we are on a tight timeline to make the upland site decision so ideally if I could get any feedback you have on these locations by June 15th, I'd really appreciate it. Please let me know if you have any questions.

Thanks and have a great weekend.

Fw: upland site presentation

Hi All.

Please see the below attachment for the presentation Tierra had put together about the 4 possible upland sediment processing sites. If you have additional questions on these please give me a call.

I hope you all have a nice week!

Elizabeth(See attached file: 042009 Upland Site Presentation.pdf)
